

Pirean

Your Vision. Our Focus.

An Introduction to Pirean

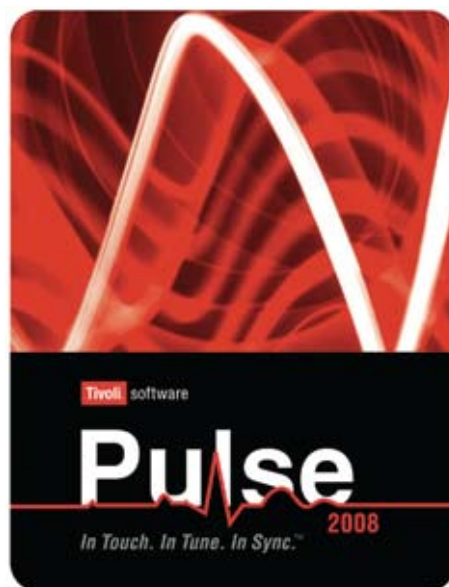

Pirean is a leading systems integrator and consultancy delivering real-time business and service assurance through solutions for infrastructure and application management.

Working in partnership with Pirean, your business will quickly realise the real value of your technology infrastructure. Our focus means we provide the capabilities and support you need to realise your business goals through a tailored mixture of:

- **Business Consulting**
- **Technology Consulting**
- **Bespoke Application Delivery**
- **Tailored Managed Services and Solution Assured Support**

An IBM Premier Business Partner, we deliver the visibility, control and automation you need over your infrastructure and applications to deliver robust business services while managing risk and compliance.

Our unique blend of services and capabilities enables us to help you take a strategic view of your business; where you are, where you want to go and how to better leverage the resources you have to get there.

**Recognised
by IBM Tivoli Software as
Innovator of the Year 2008**

As one of Europe's Leading IBM Premier Business Partners, Pirean has been awarded IBM Tivoli's AAA Accreditations across both Service and Security Management portfolios and were awarded the 2008 IBM Tivoli Business Partner Innovation Award at Pulse 2008.

Pirean partners organisations through the design, architecture and implementation of enhanced, available and reliable infrastructures and applications. We help you to accelerate the return on your IT investment through our unique mix of solutions and services – a mix of solutions and services recognised as some of the most qualified and innovative in the market today.

We help organisations consolidate and centralise services into a more streamlined solution that can be readily managed and co-ordinated, without disrupting your business or working culture.

We work with you to understand your needs and offer a full suite of services from consultation, design and implementation through to education and outsourced support.

Business Consulting

We take a strategic view of your business and support you in realising your vision.

Our Business Consulting practice offers a full transformation portfolio for existing IT processes, procedures and solutions. From programme management and delivery to analysis and strategy planning, our focus is to enhance your business through the right mix of industry insight and technical expertise.

Whether focused on performance and optimisation or regulatory compliance, we combine business process insight with an integrated technology platform.

Technology Consulting

We focus on ensuring that you get the most from your infrastructure, providing stability; taming costs and ensuring your systems work for you and your business.

Our Technology Consulting practice enables you to centralise, control and optimise the various processes and solutions typically scattered across your infrastructure.

Building on our own and our partner's technologies, we deploy unified solutions across complex IT infrastructures that provide a complete portfolio encompassing infrastructure and application management.

Integrating complex components of information systems and information technology, our Technology Consulting teams understand the spectrum of options available to you and work with our customers to realise their vision of an on-demand enterprise.

Bespoke Application Delivery

We deliver fast, flexible solutions that can be bought on an 'as needed' basis to solve your business issues.

Whether tailoring our own or our partner's technologies or developing a solution bespoke to your organisation, our application delivery practice provides the capability and flexibility you need to react to business issues on-demand.

Alongside our solution portfolio for security policy, logical access management, IT service management and service desk integration our bespoke application delivery services ensures a solution tailored to your specific requirements.

Tailored Managed Services and Solution Assured support

Designed with one purpose in mind – freeing up your valuable IT resources to drive your company forward.

Pirean's Solution Assured Portfolio is a unique concept designed to remove the burden of ongoing technical maintenance and support from internal IT teams through a programme of care delivered by Pirean.

Working in partnership with IBM, we deliver a better return on your investment through outsourced support and managed services - rapidly relieving the strain of overworked, overly-complex IT systems and enabling your organisation to extend its reach without significant investment.

From tailored managed services to outsourced support, our partnership based approach provides the assurances you need to underwrite your IT infrastructure.
